

# CONGENITAL ANOMALIES

Volume 46 • Number 3 • September 2006

---

## CONTENTS

### Review Articles

- 123 **Essential roles of *Gli3* and sonic hedgehog in pattern formation and developmental anomalies caused by their dysfunction**  
Jun Motoyama
- 129 **Application for regenerative medicine of epithelial cell culture-vistas of cultured epithelium**  
Hajime Inoue, Hideo Oshima, Kyo-Ichi Matsuzaki, and Norio Kumagai

### Original Articles

- 135 **Genome-wide screening of dioxin-responsive genes in fetal brain: bioinformatic and experimental approaches**  
Hideki Fujita, Hazuki Samejima, Noriyuki Kitagawa, Takayuki Mitsuhashi, Takanori Washio, Junzo Yonemoto, Masaru Tomita, Takao Takahashi, and Kenjiro Kosaki
- 144 **Genetic susceptibility in the neural tube defects induced by ochratoxin A in the genetic arhinencephaly mouse, *Pdn/Pdn***  
Ken-ichi Ohta, Mizuho Maekawa, Ryu-ichi Katagiri, Etsuko Ueta, and Ichiro Naruse
- 149 **Analysis of polyploid cells in mouse embryonic cells cultured under diabetic conditions**  
Reiko Tatewaki, Yukiko Kagohashi, and Hiroki Otani
- 155 **Dopamine transporter density and behavioral response to methylphenidate in a hyperlocomotor rat model**  
Katsumasa Muneoka, Makiko Kuwagata, Masaaki Iwata, Yukihiro Shirayama, Tetsuo Ogawa, and Morikuni Takigawa

### Case Report

- 160 **Callosal agenesis followed postnatally after prenatal diagnosis**  
George Imataka, Eiji Nakagawa, Shigeo Kuwashima, Hiroshi Watanabe, Hideo Yamanouchi, and Osamu Arisaka

### Society News

- J5 **Activities and Announcement**
