

in Medical Journals” as published by the International Committee of Medical Journal Editors (ICMJE). For any information that is not mentioned in this guideline, authors should refer to the ICMJE Recommendations.

Peer Review

Peer review is a critically important process of evaluation for any manuscript submitted to the JMA Journal. Every article dispatched for full peer review will receive a comprehensive, fair, and unbiased critical assessment.

All submitted manuscripts will be reviewed, initially, by the editors of the JMA Journal to evaluate eligibility for publication. The editors will assess the importance and originality of the research, suitability and interest to the readership of the journal, and the quality of the manuscript. Any manuscripts that satisfy our screening criteria will generally be sent to two experts in the field of the study for peer review.

Charges

The JMA Journal is fully funded by the Japan Medical Association. There is no charge to submit to or publish in the journal.

Specifications by Article Types

Article Type	Abstract		Main Text		Tables	Figures	References	
	Style	Words	Headings	Words				
Review Article	Narrative Review	Unstructured	300	-	4,000	7	10	75
	Systematic Review	Structured		Introduction, Materials and Methods, Results, Discussion				
Original Research Article	Structured	300	Introduction, Materials and Methods, Results, Discussion	3,500	5	6	-	
Clinical Trial	Structured	300	-	3,500	5	6	-	
Guideline	Unstructured	300	-	4,000	7	10	-	
Opinion	Unstructured	300	-	1,500	2	3	5	
Short Communication	Not necessary		-	1,200	2	3	15	
Images	Not necessary		-	150	0	4	5	
Case Report	Unstructured	300	Introduction, Case Report, Discussion	750	3	4	10	
Letter to the Editor	Not necessary		-	400	1		5

JMA JOURNAL

We Welcome Your Manuscript Submissions!

JMA Journal

- As a peer-reviewed international general medical journal, the Journal will publish research findings from:
 - Clinical medicine
 - Basic medical science
 - Public health
 - General medicine
 - Health policy
 - Opinions
- The objectives of the Journal are to publish broad perspectives, which will be shared among the international medical community. The Journal aims to achieve this by publishing the significant research findings from all over the world.
- Online Open-Access

Greeting

The Japan Medical Association (JMA) and the Japanese Association of Medical Sciences (JAMS) are launching the *JMA Journal*, an official English medical journal.

Since the inception of the *Asian Medical Journal* in 1958 (renamed *JMAJ* in 2001), the JMA has been publishing Japanese medical studies and its activities in English.

With due consideration of the environment of global health and medical information provisions, the *JMA Journal*, a peer-reviewed publication, will be issued with the cooperation of the JAMS, as a new global platform for information dissemination, in place of the traditional *JMAJ* but continuing its traditions.

The new journal will cover all aspects of medicine and medical care, and will include contributions from medical researchers and healthcare professionals in Japan and elsewhere, on a wide range of areas, including original work, health policy, global health, and other commentary.

The editors-in-chief are Dr. Yutaka Atomi, President of Kyorin University and Dr. Tsuguya Fukui, President of St. Luke's International Hospital, and the advisory board and editorial board will be made up of a group of prominent researchers worldwide.

The publication of this type of comprehensive medical journal is the first challenge in Japan. We sincerely hope that the *JMA Journal* will promote international medical science and contribute to the improvement of the quality of health care by being read and cited by many people.

Yoshitake Yokokura, M.D.
President, Japan Medical Association
President, World Medical Association

Editorial Board as of January 31, 2018

Editors in Chief	Yutaka Atomi, MD, PhD	Professor Emeritus / President, Kyorin University
	Tsuguya Fukui, MD, MPH, PhD	President, St. Luke's International Hospital
Deputy Editor	Takashi Igarashi, MD, PhD	Chief Executive Officer, National Center for Child Health and Development Professor Emeritus of Tokyo University
Honorary Editors	Yoshitake Yokokura, MD, PhD	President, Japan Medical Association / President, World Medical Association President, Confederation of Medical Associations in Asia and Oceania
	Morito Monden, MD, PhD	President, The Japanese Association of Medical Sciences
Advisory Board	R. Alta Charo, JD	Warren P. Knowles Professor of Law, University of Wisconsin
	Sun Whe Kim, MD, PhD	Professor, Seoul National University College of Medicine
	Reiko Kishi, MD	Vice-President, The Japanese Association of Medical Sciences
	Yoshinori Ohsumi, PhD	Honorary Professor, Institute of Innovative Research, Tokyo Institute of Technology
	Peter Piot, MD	Director, London School of Hygiene and Tropical Medicine
	Junichi Sadoshima, MD, PhD	Professor and Chair, Rutgers New Jersey Medical School
	Takao Shimizu, MD, PhD	Project Leader, National Center for Global Health and Medicine
Associate Editors	Thomas C. Südhof, MD	Professor of Molecular and Cellular Physiology, Stanford University School of Medicine
	Keizo Takemi, LLM	Member of the House of Councillors
	Rajesh Thakker, MD, FRS	May Professor of Medicine, University of Oxford
	Yasunori Yoshimura, MD, PhD	Professor Emeritus, Keio University
Associate Editors	Hiro Yoshi Endo, MD, MPH, PhD	Dean, Graduate School of Public Health, St. Luke's International University
	Tetsuya Ishii, PhD	Professor, Office of Health and Safety, Hokkaido University
	Mitsuaki Isobe, MD	President, Sakakibara Heart Institute Japan Research Promotion Society for Cardiovascular Diseases
	Seiichi Matsuo, MD, PhD	President, Nagoya University

	Masaki Mori, MD, PhD, FACS	Chairman & Professor of Gastroenterological Surgery, Graduate School of Medicine Osaka University
	Yoshimi Takai, MD, PhD	Professor, Division of Pathogenetic Signaling, Department of Biochemistry and Molecular Biology, Kobe University Graduate School of Medicine
	Kenji Toba, MD	President, National Center for Geriatrics and Gerontology

Instructions for Authors (Excerpt)

Aims and Scope

The *JMA Journal* is the official peer-reviewed scientific journal of the Japan Medical Association and the Japanese Association of Medical Sciences. The journal publishes review articles, original research articles, clinical trials, guidelines, opinions, short communications, images, case reports, letters to the editor. The *JMA Journal* is broadly international both in its perspective and the country of origin of the authors it publishes. The journal's remit, through the publication of high-quality research, is to contribute to the global improvement of medical standards. The *JMA Journal* accepts articles related to medical science and medical care including clinical and basic medical science as well as public health. The journal also welcomes non-clinical studies such as health policy and opinion. All unsolicited articles receive a full and extensive peer review by recognized subject experts.

Article Types

The *JMA Journal* publishes a variety of different article types. Once you have determined the correct Article Type, it is imperative that you read the Manuscript Preparation guidelines before you submit your manuscript:

1. Review Article

Review Articles should provide a broad and comprehensive overview and updates on a specific field or topic in medical science.

2. Original Research Article

Original Research Articles should present detailed studies of original research, highlighting new and compelling findings that are impactful to other medical practitioners and researchers.

3. Clinical Trial

Clinical Trials describe a pre-planned randomized study of the safety, efficacy, or optimum dosage schedule of one or more diagnostic, therapeutic or prophylactic technique(s), device(s) or drug(s) selected according to predetermined criteria of eligibility and observed for predefined evidence of favorable and/or unfavorable effects.

4. Guideline

Guidelines present recommendations intended to optimize patient care that is informed by a systematic review of evidence and an assessment of the benefits and harms of alternative care options.

5. Opinion

Opinions should address compelling evidence-based opinions and insights important issues related to public health, health policy, or

clinical health that appeals to the international readership of the journal. The article should be written in a scholarly manner with an efficient use of references and evidence.

6. Short Communication

Short Communications are rapid and concise reports (less than 1,200 words) of new and significant research findings, or confirmatory studies (including those containing negative results) of previously published research findings.

7. Images

Pictures should provide original, high-quality images with extraordinary findings that will be useful to other medical practitioners.

8. Case Report

Case Reports present the details of extremely rare medical or clinical cases that have significant educational importance for diagnosis and treatment. Authors should be aware that the journal rarely published a case report, unless the case presented is either the world's first reported case or extremely rare case.

9. Letter to the Editor

Letters to the Editor are brief, constructive commentaries that can be submitted in response to a recently published article in the journal.

Manuscript Submission

Manuscripts may only be submitted electronically via the journal's ScholarOne system: <https://mc.manuscriptcentral.com/jmaj>.

All files must be submitted in the following order: 1) Title Page, 2) Main Document, 3) Tables, and Figures (≥300 dpi). The total size of the uploaded files should be within 100 MB. Upon submission, the manuscript will be automatically checked for plagiarism, and can be sent back to the corresponding author if the plagiarism rate is 30% or higher. The *JMA Journal* utilizes the iThenticate plagiarism screening service to determine both text overlap and manuscript originality. More information on this service, and opportunities for authors to pre-screen their work, can be found at www.ithenticate.com.

Notification of manuscript submission will be sent by e-mail to all authors listed in the manuscript.

Manuscript Preparation

Information provided here on manuscript preparation and formatting is based, in part, on the "Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work
