

CONGENITAL ANOMALIES

Volume 42 · Number 1 · March 2002

CONTENTS

Review Articles

- 1 **Molecular characterization of regenerated cardiomyocytes derived from adult mesenchymal stem cells**
Keiichi Fukuda
- 10 **Radiological protection for diagnostic examination of pregnant women**
Tomoko Kusama and Katumasa Ota

Original Articles

- 15 **PSK, a biological response modifier, modifies p53 expression, mitosis and apoptosis in X-ray irradiated mouse embryos: Possible cellular mechanism of the anti-teratogenic effect**
Yukiko Kagohashi, Hiroyuki Naora, and Hiroki Otani
- 21 **Chromosome analysis of blastocysts cultured under the diabetic condition**
Reiko Tatewaki, Yukiko Kagohashi, Kosuke Furuse, and Hiroki Otani
- 27 **Hydrocephalus manifestation in the genetic polydactyly/arhinencephaly mouse (*Pdn/Pdn*)**
Ichiro Naruse and Etsuko Ueta
- 32 **Postnatal survival of rat offspring prenatally exposed to pure 2,4-Dichlorophenoxyacetic acid (2,4-D)**
Djibril Fofana, Hidehiko Kobae, Kiyoko Sameshima, and Koichiro Miyata

Short Note

- 36 **Alteration of androgen receptor immunoexpression by neonatal DES-treatment in mouse epididymis**
Kaiya Takano, Masatoshi Komiyama, Naoji Toyota, and Chisato Mori

Society News

- 38 **2002 Japanese Teratology Members**
- 70 **Notice to Authors**
- 73 **Activities and Announcement**
