CONGENITAL ANOMALIES

Volume 43 · Number 1 · March 2003

CONTENTS

Invited Review
1 The interplay of genetic and environmental factors in craniofacial morphogenesis: holoprosencephaly and the role of cholesterol
Robin Edison and Maximilian Muenke

Review
22 Molecular pathology of human cerebral malformations
Masashi Mizuguchi

Original Article
29 Amelioration of sodium valproate-induced neural tube defects in mouse fetuses by maternal folic acid supplementation during gestation
R. Padmanabhan1 and M. Mohamed Shafiuulla2

41 A quantitative study of the facial nerve in mice prenatally exposed to ethanol
Suguru Komatsu1, Yasuo Sasaki2, and Kohei Shiota1,2

46 Opposite effects of the maternal immune system activated by interleukin-1β vs. PSK and OK432 on 5-azacytidine-induced birth defects
Toshihisa Hatta1, Akihiro Matsumoto1, Kenji Moriyama1, and Hiroki Otani1

57 The effects of dietary vitamin B12 deficiency on sperm maturation in developing and growing male rats
Toshiaki Watanabe1, Keiko Ohkawa2, Shigenobu Kasai2, Shuhei Ebara3, Yoshihisa Nakano4, and Yoshitaka Watanabe1

65 Curly vibrissae, a new mutation in the Wistar-derived rat
Sakiko Fujii1, Hiroaki Aoyama1, Ken L. Takahashi2, Masahiro Kaneda3, and Shoji Teramoto2

Case Report
72 Prenatal diagnosis and fetal therapy of congenital cystic adenomatoid malformation type I of the lung: a report of five cases
Mamoru Morikawa, Hideto Yamada, Kazuhiro Okuyama, Emi Hirayama Kato, Michiko Watari, Soromon Kataoka, Kazutoshi Cho, and Hisanori Minakami

Short Communication
79 Reproductive risk factors in unilateral and bilateral renal agenesis
Sebastiano Bianca1,2, Carmela Ingegnosi1,2, and Giuseppe Ettore1,3

Book Review
81 Drugs during Pregnancy and Lactation
Kohei Shiota
